PROGRAM

SASB (the Sustainability Accounting Standards Board) is becoming one of the most well-known sets of standards for ESG disclosure. Initially focused on the US market, in the last few years SASB has evolved towards a much more global reach.

During this session we will look at:

- Many of the world's leading investors are asking companies to use SASB standards. Why SASB? How do you get started?
- Connecting business and investors on the financial impacts of sustainability. How should Investor Relations proceed?
- What about GRI or the Task Force on Climate Related Financial Disclosures?

SPEAKERS:

Michelle Edkins. Managing Director of Investment Stewardship, **BlackRock**

Neil Stewart. Director of Corporate Outreach, **SASB**

Tomás Conde. ESG Advisor, **AERI**

Manuel Enrich. Chairman, **AERI**
